Matt finish StorageWalls in dark grey provide ample storage for employees

One of the meeting rooms at SVS

The unique circular flooring design that compliments the colour scheme of the office

SVS SECURITIES

SVS Securities approached Office Profile to refurbish their offices and meeting rooms with new furniture, carpets and storage solutions. SVS Securities specialise in advising on stockbroking and share dealing.

A key part of the project was the flooring design. SVS wanted a unique design, and had previously visited a showroom that utilised circles. They liked the concept, so our design team worked to create a circular pattern that would work with the colour scheme and layout. The offices had orange structural columns which the flooring matched perfectly, and it also complemented the branded wall mural. The carpet material was made out of a variety of patterns and colours and to give the offices an interesting twist.

Throughout the main office we supplied clean-looking white desks with durable metal frames which we paired with black operator chairs, providing a classic monochrome contrast. We supplied low white storage units throughout the

office to provide for the needs of employees, and we installed matt finish StorageWalls in dark grey to match the flooring and the overall theme.

In the meeting rooms, we supplied conference tables with TV and IT integration throughout. We supplied blue and black chairs with a silver frame which looked smart and modern and provide additional comfort with an upholstered seat, much needed during long meetings!
