

Case Study:

Serosep

Serosep are a leading diagnostic solutions provider who engaged with Office Profile on their new freehold property in West Sussex to create a spacious, employee friendly workplace and laboratory environment.

Office Profile created flexible and functional workspaces keeping in line with the Serosep branding from their HQ in Ireland. Office Profile were responsible for full design and coordination of the project which included major works to the mains power, a large solar panel installation, air source heat pumps for the office and laboratory areas plus various external landscaping and building works. Part of the process involved a comprehensive planning application for a new front entrance, solar panels, and change of colour and signage to the exterior.
